

**A:** It all depends on what Breed of dog you purchased. Rottweilers, German Shepherds, Shetland Sheep dogs, etc. are not registrable as "Shiloh's". Only Dogs that fit the Requirements specified are eligible for registry with the I.S.S.R.

**Q:** What if I have a very large female that passes all of your requirements but only has 9 "Registrable Shiloh's" in the first 4 generations can I breed her to a better quality male and then register the pups?

**A:** Yes, but only if you turn in the A.K.C. papers on both dogs to the I.S.S.R. (you are not allowed to double register individual dogs or litters!!) Your puppies would then receive their Pink (Temporary) Papers until they reached maturity and could be individually certified either Orange (For those that passed all of the requirements) or Black (for those that failed).  
Please Note: Even though a individual dog may not qualify for registration, in this case, the puppies would qualify and therefore be Registrable!!

**Q:** What if I purchase an OVERSIZED German Shepherd with a pedigree that says all of his ancestors were 30"-32"?

**A:** Proof of hips, temperament, and size on each dog as far back as the 5th generation **MUST** be submitted from the Owners and Breeders along with pictures (VHS tapes), Veterinarian statements etc., etc., etc. The Breed Warden may still choose to examine each living individual personally prior to issuing Certification Approval.

**Q:** What if the dog I purchased had 43 registrable "Shiloh's" therefore qualifying for the "Gold" category, but upon reaching maturity, my dog did not attain the size requirement?

**A:** Your dog would then have to be certified within the Orange category, and you would have a legitimate complaint against the Breeder. If your dog was guaranteed to reach size, but failed you have every right to ask for a replacement!!
